Decatur, GA 30033

Dear David Lubin,

As we come to the finish 2015, we reflect on this same time last year when we were waiting on HVAC arrival, reconciling steel deck design, confirming lighting in the pool area, making the CMU bullnosed, hassling with the health department and rearranging the work flow to keep making progress, we remember that in spite of all the hiccups we experienced you were able to stay the course and keep moving forward.

We appreciate the up front estimate of our project cost so we knew item by item what to expect, the manner in which you helped us find cost savings wherever possible, the direction you gave to your people on our behalf to adjust, modify as needed to satisfy our desires given plans from the architect that were incomplete or wrong and your rapid response to any of the issues we raised - before, during and after construction.

We are very happy to have selected you for our very unique project and look forward to continued fulfillment of our dream in the facility you built for us.

Swimcerely,

Michael Slotnick
